What should I study?

Give advice to the people below on what they should study at university. Explain.

Jack

Hi there! My name is Jack. I am 18 years old and from London. I need help deciding what to study next year at university. In my free time, I enjoy reading books about historical events and figures, watching documentaries, or visiting museums and historical sites. I am especially interested in the ancient world, and I have a vast knowledge of civilizations such as Greece, Rome, and Egypt. I also love to travel, and I'm always looking for opportunities to visit new places and learn more about history.

Hannah

Hi everyone! My name is Hannah. I am 17 years old and from Sydney. Please, can you help me decide what to study next year? I love technology and spend most of my free time working on computers. I enjoy designing websites and coding, and I like to learn new things and attend tech events. My aim is to learn more about web design and new coding languages. When I'm not studying, I like to relax by playing video games and chatting with other tech enthusiasts online.

What should I study?

Give advice to the people below on what they should study at university. Explain.

Johnny

Hi there! My name is Johnny. I am 18 years old and from Montreal. I'm not sure what to study next year, could you help me? Whether I'm painting, sketching, or working on graphic design projects, I find great joy in exploring my artistic side. I particularly love drawing and designing buildings or other similar structures, so I love to keep up with the latest drawing trends and techniques. I enjoy visiting museums and galleries, as well as attending shows and exhibitions. I like to relax by listening to music or reading about art history.

Nathan

Hi everyone! My name is Nathan. I am 17 years old and from New York. Please, can you help me decide what to study next year? In my free time, I love playing with numbers and finance. For fun, I work on money projects and solve math problems. I always look for ways to learn more and go to workshops and seminars about finance and math. I read about finance and economics too. I also like playing games that use numbers and strategy. I feel happy and fulfilled when I'm working with numbers.

1. Do you know any other degrees that people study at university?
2. Which degree do you think you could pass?
3. Which degree do you think you would fail?
4. Which degree do you think is the most boring?
5. Which degree do you think is the most interesting?

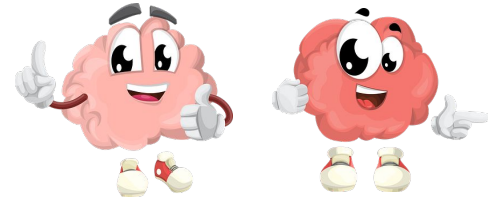

Should I go to University?

Cons of University

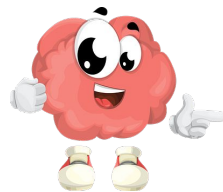

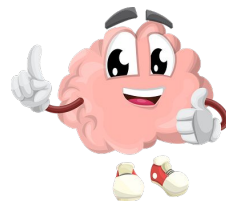

Debt.

Everyone knows how expensive university is nowadays. Therefore, unless you have the financial means to pay for your education upfront, you will be graduating not just with a degree but also with debt. Plus, there are other expenses to consider, such as your accommodation costs and living expenses. However, some students are able to apply for financial help and scholarships.

No Job Guarantee.

The only guarantee you get from going to university is that you'll graduate with a degree. Apart from that, there is no guarantee that you will find a job easily. The job market is competitive, and you'll need skills, qualifications, and experience to stand out from others. However, on many occasions, a degree is a minimum requirement for a job role.

Cons: True or False?

University is expensive so students end up with debt.

or

Students have to pay for accommodation and other living costs.

or

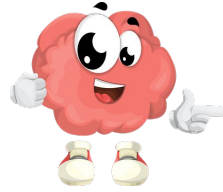

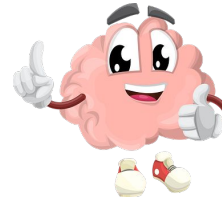

Students are guaranteed a job after university.

or

Check your answers!

University is expensive so students end up with debt.

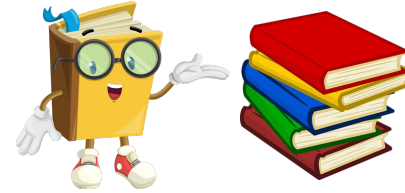

Students have to pay for accommodation and other living costs.

Students are guaranteed a job after university.

Cons: Part 2

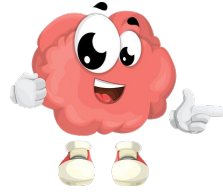

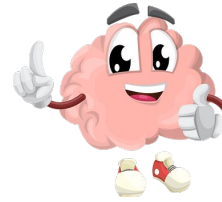

Lots of work.

University is hard. There are a lot of classes, exams, coursework, projects, and essays to be written. This amount of work can be stressful, especially if you also choose to work during your studies or decide to take part in sports and social events, which will also take up a lot of your time. If you don't like stress, university could be quite difficult, but if you work hard, you will learn how to deal with everything.

Big commitment.

Going to university is a long-term commitment that could require three to eight years of study, depending on the degree you choose. This can be a challenge if you are a working professional because you'll have to quit your full-time job to go to university. But even if you're a young student, this can still be a consideration. After all, you will be missing years of income and gaining more debt.

Part 2: True or False?

Students have lots of classes, exams, coursework, projects and essays.

or

Most students also have to work, play sport and attend social events.

or

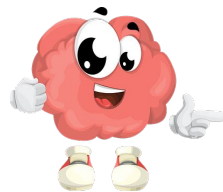

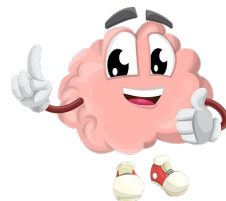

Studying at university could require three to eight years of study.

or

Check your answers

Students have lots of classes, exams, coursework, projects and essays.

Most students also have to work, play sport and attend social events.

Studying at university could require three to eight years of study.

Discussion questions

1. How do students end up with debt after university?
2. What is meant by "living costs"?
3. What is a scholarship? How do they benefit students?
4. How can students "stand out" in a competitive job market?
5. Describe a typical student's workload.
6. Describe how attending university is a big commitment. What are the cons of this?

Phrasal verbs

Find out

Read the sentences then guess the meaning of “find out”.

Sentences

1. She wants to **find out** more about the different career paths available to her.
2. They decided to **find out** about the different study abroad courses offered by their university.
